

USER MANUAL

VERBATIM HARD DRIVE

Please read

Please note; this manual is a general manual which is used for several Verbatim products. Product pictures shown in this manual may differ from the device you purchased.

Contents of the box

Please check the contents of the box. All articles included in this box are listed on the packaging.

Need assistance? Have questions?

In case you have a question about the use of this product, need information about other Verbatim products or need technical assistance, please contact the Verbatim Service Centre for your country. See www.verbatim.com/support for details.

All rights reserved. The products named in this manual are only used for identification purposes and may be trademarks or registered trademarks of the respective companies. This device was designed for home or office use.

Warning!

This device is equipment complying with EN55022 class A. This equipment can cause radio disturbances in a residential area. If this is the case, the user has to take appropriate measures and assume all responsibility and costs. It may not be used near or with any life-sustaining systems.

Verbatim cannot be made liable for any damages, loss of data or damage following thereof (including without limitation, damages for loss of business profits, business interruption, loss of business information, or other pecuniary loss) arising out of the use of or inability to use this Verbatim product, even if Verbatim has been advised of the possibility of such damages.

We reserve the right to upgrade our products in keeping with technological advances.

General Information

System requirements

PC:

- Intel Pentium III / AMD Duron 900 MHz or higher
- 512 MB RAM or higher
- Available USB-A/ USB-C[™] port*
- Internet connection for online warranty registration, software updates and downloads
- Operating system: Windows 7, 8, 10

Mac:

- PowerPC G5 or Intel Mac
- 256 MB RAM or higher
- Available USB-A/ USB-C[™] port*
- Available Thunderbolp ort*
- Internet connection for online warranty registration, software updates and downloads
- Operating system: Mac OS X v10.4.6 or higher

^{*} Please use the interface cables that come with your device (e.g. USB, Thunderbolt) for connecting the device to your PC/Mac.

Precautionary Measures

Please take note of the following precautions. Failure to do so may void your warranty or result in damage to the device.

- Safely remove the Verbatim Hard Drive via your operating system (the "unplug or eject hardware" option in the Windows taskbar) before disconnecting the USB cable. Failure to do so may result in data loss.
- Do not drop or expose it to other kinds of sudden mechanical shocks as this may result in data loss and damage to the Verbatim Hard Drive.
- Do not use when the ambient temperature is below 10°C or above 35°C.
- Allow the device to acclimatise to the ambient temperature before operating. Failure to do so may lead to condensation within the drive enclosure which may result in malfunction
- Do not expose to moisture or liquid as it may cause the drive to malfunction.
- Do not use the device in a dusty environment as this may cause the drive to malfunction.
- Dismantling your Verbatim Hard Drive will void the warranty.

Please contact the Verbatim Support Centre should you need assistance during installation or configuration. See **www.verbatim.com/support** for details.

Formatting

The high speed data transfer through the interface (e.g. USB, Thunderbolt) makes it ideally suitable for data-storage, file sharing, backup, archiving, audio playback and all applications that need fast file access.

The Verbatim drive comes preformatted in FAT32 (for drives with a capacity of 1TB and 2TB) or NTFS (for drives with a capacity of 3TB and 4TB or higher). FAT32 format allows operation with either Windows or Mac OS. NTFS format is only compatible with Windows 7, 8 and 10, and only readable for Mac OS. If you want to use your drive on a Mac system please reformat the drive in HFS+ format. Reformatting the drive will delete all the data on the drive so be sure to save them before.

Chapter: Hardware Installation

- 1. Connect the interface cable* to the Verbatim Hard Drive.
- 2. **Devices with power cables**: Connect the cable of the power supply to the Verbatim Hard Drive and the power supply itself to the socket.
- 3. Connect the interface cable* to the interface port of your computer.
- 4. If your device comes with a power switch, switch on the device before using it.
- * Please use the interface cables that come with your device (e.g. USB, Thunderbolt) for connecting the device to your PC/Mac.

Chapter: Driver Installation

Under Windows 7/8/10 and Mac OS X a se arate Verbatim driver is not required. The drivers will be installed automatically by the operating system after plugging in the Verbatim Hard drive into the interface port of the computer.

ΕN

Chapter: Installation of the Application Software

Software installation PC

1. Click on "Start PC.exe" in the main directory of the hard drive. The Verbatim start menu opens.

Welcome	Verbatim.	
Verbatim Hard Drive	Welcome	
	Manuals	
	Software	
	Support	
	Verbatim-Products	
Show drive contant	Save Verbatm files	
m	Close	

2. Click on "Software". The installation will now start. Follow the instructions on screen, confirm with "Next" in order to continue with the installation.

Saving Verbatim data

The user manuals and complimentary software (where applicable) are pre-loaded onto the hard drive. We recommend that you save these files to your computer ("My Documents"/"Verbatim"), to always have a backup of these files in case you accidentally reformat the drive or delete these files from the drive.

Saving these files from the external hard drive to your computer is easy:

- 1. Click on the button "Save Verbatim files".
- 2. All provided data on the Verbatim hard drive will be saved to the folder "Verbatim" in "My Documents".

Using Time Machine with your Verbatim Hard Drive

Time Machine allows you to make automated backups of your complete system under Mac OS X 10.5 and Mac OS 10.6 or higher.

- 1. Connect your Verbatim Hard Drive via the interface to your Mac. If you did not specify a backup volume yet, Time Machine will ask you when connecting the Verbatim Hard Drive for the first time if the device shall be used as backup drive.
- After your Verbatim Hard Drive appears on the desktop, click on "Use as Backup Disk" to confirm that you want to use your Verbatim Hard Drive for Time Machine backups. In the Time Machine preferences you can configure your backup settings further.

Time Machine now automatically creates backups of your Mac. Time Machine will keep hourly backups for the last 24 hours, daily backups for the last month and weekly backups until your Verbatim Hard Drive is full.

The first backup can take some time, so it is sometimes easier to create the first backup overnight.

Note: If your Verbatim Hard Drive is formatted in NTFS or FAT 32 format, you need to format your drive in Mac OS Extended (Journaled) format. Failure to do so will result in all data being deleted!

Chapter: Partitioning your Verbatim Hard Drive

ΕN

General information

The Verbatim drive comes preformatted in FAT32 (for drives with a capacity of 1TB and 2TB) or NTFS (for drives with a capacity of 3TB and 4TB or higher). FAT32 format allows operation with either Windows or Mac OS. NTFS format is only compatible with Windows 7, 8 and 10, and only readable for Mac OS. If you want to use your drive on a Mac system please reformat the drive in HFS+ format. Reformatting the drive will delete all the data on the drive, so be sure to save them beforehand. We do not recommend changing the current configuration of your Verbatim Hard Drive.

For some users another file system might fit better for their needs. This manual describes current limitations of most common file systems and instructions to enable you to adapt the Verbatim Hard Drive to your needs.

File System features

Please refer to the tables below for an overview:

File system Operating system	FAT	FAT32	NTFS	HFS+
Windows 7/8/10	yes	yes	yes	no
Mac OS X	yes	yes	yes (only read)	yes

File systems supported by different operating systems

Maximum size of a partition

File system				
	FAT	FAT32	NTFS	HFS+
Operating system				
Windows 7/8/10	4 GB*	32 GB	16 TB	-
Mac OS X 10.1.x	-	128 GB	-	2 TB
Mac OS X 10.2.x	-	128 GB	-	8 TB
Mac OS X 10.3.x or higher	_	(-> 128 GB)	_	16 TB

Example for different partitions with different file systems on one Verbatim Hard **EN** Drive

250 GB 220 GB	30 GB
---------------	-------

Note: On NTFS formatted hard drives can only be written under Windows 7/8/10. Under MacOSX data can only be read.

The example above is a good solution for Windows 7/8/10 users who sometimes exchange data with Macs.

For storing the data under Windows 7/8/10 both partitions can be used. As the NTFS file system can only be read by Mac data to be used on these operating systems must be stored on the FAT32 partition.

Please follow the steps below to adapt the Verbatim Hard Drive for your needs.

Partitioning your Verbatim Hard Drive under Windows 7/8/10

Deleting a partition

- 1. Click with the right mouse button on the "My Computer" icon on your desktop.
- 2. Select the option "Manage".
- 3. Select the option "Storage" -> "Disk Management".
- 4. Choose your external Verbatim Hard Drive and right-click on the partition.
- 5. Select "Delete Partition" and confirm by clicking on "Yes". The partition will be deleted.

Creating a partition

The following steps will guide you through the process of creating partitions on your Verbatim Hard Drive. After this procedure your Verbatim Hard Drive will be ready for use and it will be allocated a drive letter.

- 1. Click with the right mouse button on the "My Computer" icon on your desktop.
- 2. Select the option "Manage".
- 3. Select the option "Storage" -> "Disk Management".

4. Choose the hard drive, which is "unallocated". Ensure that the entire drive is "unallocated". EN

To close this wizard, click Finish.	

Creating two or more partitions on the Verbatim Hard Drive under Windows 7/8/10 EN

- 1. Repeat the steps from the previous chapter (Creating a partition on the Verbatim Hard Drive under Windows 7/8/10) for creating the first partition.
- 2. Click with the right mouse button on the "My Computer" icon on your desktop.
- 3. Select the option "Manage".
- 4. Select the option "Storage" -> "Disk Management".
- 5. Right-click on the unallocated space of your Verbatim Hard Drive and select the option "New partition". The "New Partition Wizard" opens. Click on "Next".
- 6. Now you can adjust the size of your partition. Enter the size and click on "Next"

Maximum disk space in MB:	953857
Minimum disk space in MB:	8
<u>Simple volume size in MB:</u>	32000

7. Click on "Finish" to create the "Extended partition". The unallocated space is now changed **EN** to "Free space".

Here you can setup the partition settings and partition the drive according to your settings (e.g. Mac OS Extended). Detailed information on how to use the Disk Utility can be found in the help menu:

Limited Warranty Terms

Verbatim GmbH warrants this product to be free from defects in material and workmanship for a period of 2 years from date of purchase. This warranty excludes batteries. If this product is found to be defective within the warranty period, it will be replaced at no cost to you. You may return it with your original cash register receipt to the place of purchase or contact Verbatim.

Product replacement is your sole remedy under this warranty, and this warranty does not apply to normal wear or to damage resulting from abnormal use, misuse, abuse, neglect or accident, or to any incompatibility or poor performance due to the specific computer software or hardware used.

VERBATIM WILL NOT BE LIABLE FOR DATA LOSS OR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES, HOWEVER CAUSED, FOR BREACH OF WARRANTIES OR OTHERWISE. This warranty gives you specific legal rights and you may also have other rights which vary from state to state or country to country.

NOTE: Verbatim GmbH may at any time revise the content of this user guide without further notice.

Rights

Copyright C 2020 Verbatim GmbH. No part of this document may be reproduced in any form or by any means, for any purpose, without the express written permission of Verbatim GmbH. All rights reserved.

All other brands and product names referenced herein are property of their respective owners.

FCC Compliance

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

WEEE Notice

The Directive on Waste Electrical and Electronic Equipment (WEEE), which entered into force as European law on 13th February 2003, resulted in a major change in the treatment of electrical equipment at end-of-life.

The WEEE logo (shown at the left) on the product or on its box indicates that this product must not be disposed of or dumped with your other household waste. For more information about electronic and electrical waste equipment disposal, recovery, and collection points, please contact your local municipal household waste disposal service or shop from where you purchased the equipment.

CE Declaration

EC Declaration of Conformity

Complied the requirements set out in the Council Directive on the Approximation of the Laws of the Member States relating to Electromagnetic Compatibility (2014/30/EC) and Low Voltage Protection 2006/95/EC.

This declaration applies to all specimens manufactured identical to the model submitted for testing/evaluation.

EN 55032:2012+ AC:2013 (Class B) EN 61000-3-2:2014 EN 61000-3-3:2013 AS/NZS CISPR 32:2013 EN 55024:2010 IEC 61000-4-2: 2008 IEC 61000-4-3: 2006+ A1:2007+ A2:2010 IEC 61000-4-3: 2013 IEC 61000-4-5: 2014 IEC 61000-4-6: 2013 IEC 61000-4-8: 2009 IEC 61000-4-11: 2004

RoHS Compliance

This product is in compliance with Directive 2011/65/EU of the European Parliament and of the Council of 18 December 2006, on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) and its amendments. Substances of Very High Concern (SVHC) including 169 substances contained in Candidate List of June 20th 2016 are not present in this product range above permitted levels.
